PROJECTS

Shopify-Ecommerce

[Live site](#)

- Designed and developed and eCommerce website for selling products.
- It's built using ReactJS, NodeJS, ExpressJS, MongoDB, Bootstrap which is a frontend framework.
- Here I have implemented both Client side and Admin Side Application. Empowered admins to efficiently manage orders, and update order statuses, Add new products and new categories of Products, etc.
- for Enhancing Security I have used Cryptographic tools like **JWT** Token based authentication and **bcrypt** for hashing passwords and then storing in database to enhance password security.

Foodocity

[Live site](#)

- A Real World Responsive Front-End Platform to get the healthy meals for the society 365 days.
- It's built using HTML, CSS, Javascript, Bootstrap which is a frontend framework.
- It's fully responsive on all devices with different sizes .

ChatApp

[Live site](#)

- Designed and developed the application for the real time interaction between two users .
- It's built using **ReactJS** and library ChakraUI for styling purpose.
- In this I have Used **Firebase** for Data storage and user Authentication.

Portfolio Website

[Live site](#)

- Designed the personal portfolio website for showcasing about myself, my skills , projects etc
- It's fully responsive for all sizes and built using HTML, CSS, and some Javascript effects.
